

M2 junctions 5 to 7 drainage and barrier upgrade

As we need to remove the old barriers to complete our work, we're setting up narrow lanes on the M2 to keep everyone on the motorway safe until our work is finished.

This work is currently planned to run until summer 2024, and we'll be providing more information in these updates as work progresses.

Upcoming closures:

- **Monday 8 & Tuesday 9 January:** the M2 coastbound will be closed between junctions 4 and 6 from 8pm to 6am each night.
- **Wednesday 10 to Friday 19 January (excluding Saturday 13 January):** the M2 London-bound between junctions 7 and 5 will be closed from 8pm to 6am each night. You may also notice work within the hard shoulder on the London-bound carriageway during the day on Wednesday 10 & Thursday 11 January.
- **Thursday 11 & Friday 12 January:** the dedicated link between the M2 coastbound and A299 Thanet Way will be closed between 8pm and 6am each night. To join the A299, please use the roundabout.

We're also taking the opportunity to carry out some resurfacing work during our closures.
